

MS in Cybersecurity

excellence, leading high performing teams, strengthening organizational communication, leading change management initiatives, and enabling the leadership potential of others. Additional topics may include individual and group behaviors, interpersonal relationships, and organizational structure and design. Importantly, students will learn the science behind strategic leadership in agile, high performing technology organizations.

This course introduces students to the conceptual models, methods and tools of enterprise Business Continuity Management (BCM) and a key component, Global Crisis Communications Management. Students will be exposed to industry best practices and guidelines as developed by international BCM governance and organizations like the Business Continuity Institute (BCI) and the Disaster Recovery

advisor who acts as the student's supervisor, and with the permission of the program director. The student is requi
